

many cases, family support volunteers are in the same position as those they seek to help. Their spouses are also deployed into harm's way, and I know that many of them have gotten involved as ombudsman persons because of some of the trauma that they experienced.

Madam Speaker, I cannot tell my colleagues how deeply honored I am today for the opportunity to recognize America's family support volunteers. These brave men and women give selflessly of themselves for no pay and no recognition, and they often contribute their own resources to those in need. They do it for their loved ones. They do it for their community, and they do it for their nation.

Our service members need these dedicated volunteers to help keep the home fires burning so that they can focus on the task of fighting the global war on terror, a task that is more difficult if they are worried about their families back home. Knowing their families have the full support of a dedicated volunteer helps to ease their fears and concerns.

I commend these volunteers who so selflessly serve our armed forces and our Nation. The support they give to our military families is truly invaluable, and our country owes them a large debt of gratitude.

Madam Speaker, I see that there are no further speakers. I am delighted to present this. I look forward to presenting it to the ombudspeople and the key volunteers in the San Diego region, and I know that they will be pleased with this recognition from the United States Congress.

Madam Speaker, I urge my colleagues to support this resolution, and I yield back the balance of my time.

Mr. KLINE. Madam Speaker, I yield myself such time as I may consume, only to thank the gentlewoman from California for introducing the resolution. This important resolution is long overdue in order that we recognize the wonderful members of the military family support volunteers.

I urge my colleagues to support this resolution.

Madam Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mrs. BIGGERT). The question is on the motion offered by the gentleman from Minnesota (Mr. KLINE) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 486.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

COMMENDING THE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION AND ITS EMPLOYEES FOR ITS DEDICATION AND HARD WORK DURING HURRICANES CHARLEY AND FRANCES

Mr. EHLERS. Madam Speaker, I move to suspend the rules and agree to

the concurrent resolution (H. Con. Res. 488) commending the National Oceanic and Atmospheric Administration and its employees for its dedication and hard work during Hurricanes Charley and Frances, as amended.

The Clerk read as follows:

H. CON. RES. 488

Whereas the National Oceanic and Atmospheric Administration's National Weather Service consistently provides critical forecasts and warnings about severe weather to the Nation's citizens;

Whereas 2 hurricanes, Charley and Frances, recently hit the State of Florida back-to-back, an event which has not occurred since 1964;

Whereas Hurricane Ivan was the third hurricane in a month to hit the United States mainland;

Whereas the employees of the National Oceanic and Atmospheric Administration Tropical Prediction Center/National Hurricane Center and the employees of key Southern Region Weather Forecast Offices worked tirelessly and under great pressure to provide the most up to date information to the public, the media, and emergency management officials during Hurricanes Charley, Frances, and Ivan;

Whereas the employees of the National Hurricane Center conducted 656 live television interviews as well as 1227 telephone briefings to the media and others during Hurricanes Frances and Ivan;

Whereas the forecasts and information from the National Hurricane Center provided notice for the safe evacuation of more than 6,000,000 residents in the line of Hurricanes Charley, Frances, and Ivan and warnings to the residents of Florida, Mississippi, Alabama, and Louisiana;

Whereas the Hurricane Liaison Team, a joint National Oceanic and Atmospheric Administration and Federal Emergency Management Agency partnership, provided support to the 25 different media outlets operating out of the National Hurricane Center;

Whereas the National Oceanic and Atmospheric Administration's Hydrometeorological Prediction Center provided rainfall forecasts and hurricane track guidance to the National Hurricane Center;

Whereas the National Weather Service's National Data Buoy Center, in partnership with the United States Coast Guard, worked expeditiously after Hurricane Charley to fix data buoys that proved critical for forecasts of Hurricane Frances and Ivan;

Whereas the National Oceanic and Atmospheric Administration's National Ocean Service provided storm surge predictions and hydrographic information support to Federal partners before, during, and after Hurricanes Charley, Frances, and Ivan;

Whereas the National Oceanic and Atmospheric Administration's National Environmental Satellite Data and Information Service provided images of Hurricane Frances every 5 minutes over a 4-day period, an unprecedented number of images for hurricane tracking;

Whereas the Southern and Eastern Region Weather Forecast Offices of San Juan, Miami, Tampa Bay, Key West, Melbourne, Jacksonville, Tallahassee, Atlanta, Birmingham, Huntsville, Mobile, Morristown, Charleston, Morehead City, Wilmington, Wakefield, Taunton, Lake Charles, New Orleans, Jackson, Nashville, and Houston provided up-to-the-minute local details for residents throughout Hurricanes Charley, Frances, and Ivan;

Whereas employees from other offices within the Southern Region provided additional support to key Weather Forecast Of-

fices directly impacted by Hurricanes Charley, Frances, and Ivan;

Whereas more than 1,700 watches, warnings, advisories, and other statements were issued by key local Weather Forecast Offices during Hurricanes Charley, Frances, and Ivan;

Whereas the National Oceanic and Atmospheric Administration's Marine and Aviation Operation's Hurricane Hunters logged 344 hours of flight time through and above the storms to assist the National Hurricane Center in tracking Hurricanes Charley, Frances, and Ivan;

Whereas the 53rd Weather Reconnaissance Squadron of the 403rd Wing of the Air Force Reserve Command at Keesler Air Force Base, Biloxi, Mississippi, logged 537 hours of flight time through and above the storms to assist the National Hurricane Center in tracking Hurricanes Charley, Frances, and Ivan;

Whereas the Southeast River Forecast Center provided critical river flooding forecast information to Federal, State, and private partners during Hurricanes Charley, Frances, and Ivan and accurately predicted the amount of excessive rainfall over the Southeastern United States several days in advance; and

Whereas it is still the first half of hurricane season and all these employees remain engaged tracking tropical storms: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress—

(1) commends the employees of the National Weather Service, especially the National Oceanic and Atmospheric Administration Tropical Prediction Center/National Hurricane Center, Hydrometeorological Prediction Center, and National Data Buoy Center; the 53rd Weather Reconnaissance Squadron of the 403rd Wing of the Air Force Reserve Command at Keesler Air Force Base, Biloxi, Mississippi; the National Oceanic and Atmospheric Administration Aircraft Operations Center at MacDill Air Force Base, Tampa, Florida; the Hurricane Liaison Team; the National Ocean Service; and the National Environmental Satellite Data and Information Service, for their extraordinary dedication and hard work during Hurricanes Charley, Frances, and Ivan;

(2) commends the Southern and Eastern Region Weather Forecast Offices of San Juan, Miami, Tampa Bay, Key West, Melbourne, Jacksonville, Tallahassee, Atlanta, Birmingham, Huntsville, Mobile, Morristown, Charleston, Morehead City, Wilmington, Wakefield, Taunton, Lake Charles, New Orleans, Jackson, Nashville, and Houston for their extraordinary dedication and hard work during Hurricanes Charley, Frances, and Ivan;

(3) thanks the commercial and media meteorologists for their contributions in disseminating the National Oceanic and Atmospheric Administration forecasts and warnings to the public; and

(4) expresses its support for the ongoing hard work and dedication of all who provide accurate and timely hurricane forecasts.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Michigan (Mr. EHLERS) and the gentleman from North Carolina (Mr. MILLER) each will control 20 minutes.

The Chair recognizes the gentleman from Michigan (Mr. EHLERS).

GENERAL LEAVE

Mr. EHLERS. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material

on H. Con. Res. 488, the resolution now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. EHLERS. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, today we are considering H. Con. Res. 488, which commends the employees of the National Oceanic and Atmospheric Administration for their dedication and hard work during Hurricanes Charley, Frances and Ivan.

As chairman of the subcommittee with jurisdiction over the National Weather Service, I introduced this resolution 2 weeks ago, after Hurricanes Charley and Frances hit the State of Florida back-to-back, something that had not happened since 1964. The employees of the National Weather Service worked tirelessly during the storms to provide forecasts and warnings to alert citizens and help minimize loss of life during the storms.

I have here pictures of Hurricane Frances, and also, in a moment, I will get to Hurricane Ivan. But I would like to point out the immense extensions of Hurricane Charley, covering virtually the entire State of Florida and the entire State of Texas. And almost any Texan in this body would tell us, it is almost impossible to cover the State of Texas, but Hurricane Frances, in fact, would do that.

Fortunately, the winds diminished before it hit land, and that helped considerably in reducing the damage, but it was still, because of its large extent, a very damaging hurricane.

Last week, Hurricane Ivan hit the U.S., the worst hurricane to hit the U.S. since Hurricane Floyd in 1999. Hurricane Ivan, which made landfall near Gulf Shores, Alabama, was the sixth most powerful Atlantic tropical storm on record. It affected States throughout the southeastern and Mid-Atlantic United States, with flooding, high winds and tornadoes. Again, the hard work of NOAA's employees and the broadcast meteorologists was vital for getting out warnings and information to residents in the path of the hurricane.

The right-hand chart up here shows Hurricane Ivan as it came ashore near Gulf Shores, extensive spread through Alabama, Mississippi, nearly to the New Orleans area, and with a very well-defined eye, indicating very high winds, very compact, which means high intensity, and of course, it stretched all the way over to the Panhandle of Florida.

During these three hurricanes, an estimated 6 million people were safely evacuated. Without the warnings from NOAA, I suspect there would have been very few evacuated. While there were 90 fatalities and an estimated \$14 billion to \$23 billion in damages in the U.S. due to these storms, without the forecasts and warnings from NOAA, the results would have been much, much worse.

It costs about \$1.4 billion annually for all weather forecasting at NOAA which comes to a mere 4 cents each day per household in the United States. This investment is well worth it, given the lives saved by NOAA's forecasts and warnings. Let me point out that the amount that this comes to per household in this Nation is, I would estimate, less than the amount that the average household expends on smoke detectors and batteries.

Let me specifically list the offices at NOAA and their Federal and private partners that play an important role in providing hurricane forecasts and warnings. The National Hurricane Center, the Southern and Eastern Region Weather Forecast Offices of San Juan, Miami, Tampa Bay, Key West, Melbourne, Jacksonville, Tallahassee, Atlanta, Birmingham, Huntsville, Mobile, Morristown, Charleston, Morehead City, Wilmington, Wakefield, Taunton, Lake Charles, New Orleans, Jackson, Nashville, and Houston.

In addition, the National Ocean Service provides services and, in this case, provided help with storm surge predictions.

The National Environmental Satellite Data and Information Service provided the satellite images we all saw on television.

The NOAA Marine and Aviation Operation Hurricane Hunters and the Air Force Reserve out of Keesler Air Force Base in Biloxi, Mississippi, fly planes into the hurricanes to gather data.

The Southeast River Forecast Center provided flood predictions, and the many private meteorologists and information providers who disseminate the warnings and weather data and predictions from NOAA.

I must say, being a scientist, perhaps that affects me, but I watched the Weather Channel and the local forecasters for considerable amounts of time during this to try to evaluate for myself what the hurricanes were doing, what direction they were taking, what damage they might cause. So the private sector also deserves mention here.

The dedicated employees of all of these NOAA organizations and the private organizations deserve our utmost appreciation for their hard work and long hours to warn citizens in the line of these three storms and for all of their excellent work as they continue to track tropical storms, this and every hurricane season. I should note that today we are nervously watching Hurricanes Jeanne and Karl currently located in the Atlantic Ocean, and we will continue to depend on NOAA to give us information about those hurricanes.

Madam Speaker, I reserve the balance of my time.

Mr. MILLER of North Carolina. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I thank my colleague, the gentleman from Michigan (Mr. EHLERS), for bringing this resolution to the floor today. In the last

month or two, all of us in the eastern United States have been glued to our television sets watching weather reports as one Atlantic storm after another moved westward from the west coast of Africa across the Atlantic towards the United States. Three storms have made landfall in the United States and done great damage, great property damage and great loss of life.

We have learned more and more about storms just from watching the weather reports, watching with fascination the symmetry, the amazing symmetry of the storms, learning about the definition of the eye wall, how that told us whether the storm was strengthening or weakening or maintaining its strength.

There has been great damage and great loss of life from these storms. Hurricane Charley, which struck and made landfall in Florida as a category 4 storm, resulted in 31 deaths. Hurricane Frances made landfall in Florida as a category 2 storm but stalled over Florida and just rained and rained and rained with great, great damage. And, most recently, Hurricane Ivan struck the Panhandle of Florida and Alabama as a weak category 4, and then moved upward and caused a total of 49 deaths, including about 10 in my State, in flooding in western North Carolina.

These were powerful storms, but we were relatively well prepared for them. The gentleman from Michigan (Mr. EHLERS) referred to the great, great savings in life that resulted from the preparation that we had as a result of the work of NOAA, but let me tell my colleagues how much of a difference that made.

When we look back early in our history, a much less densely populated country, a nation that was not prepared, had no forewarning when storms struck, let me tell my colleagues the loss of life. In 1893, a storm of unknown intensity struck Louisiana, made landfall in Louisiana. The estimate was that there were 2,000 deaths from that storm. That same year, a storm also of unknown intensity made landfall in South Carolina and Georgia with a loss of life of 1,000 or 2,000. In 1900, a storm that we now estimate to be a category 4 struck without warning Galveston and resulted in an estimated 8,000 to 12,000 deaths. In 1928, a storm struck again with very, very little warning in Florida, and resulted in more than 1,800 deaths.

Again, this is a striking contrast. We can thank the people of NOAA, the employees of NOAA for the forecasts and the warnings that we have relied upon to prepare for the storms that have struck the United States this year. It is not an exaggeration to say, because of the work of the employees at NOAA, that there are thousands of Americans alive now who would not have been alive had we not been prepared for these storms, and the way that we have not been prepared for storms before we had that capacity to see storms coming, to know their intensity and to prepare for them.

We now see more storms moving towards us. Hurricanes Jeanne and Karl and storms behind them seem to be taking a number as they are in line, moving towards the United States.

So this resolution is a modest gesture of appreciation for those employees of NOAA who are working around the clock to monitor the paths of hurricanes, the strength of hurricanes, to make sure that we are ready when those hurricanes reach the United States.

So I urge my colleagues to support this resolution.

Madam Speaker, I yield 2 minutes to the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON).

Ms. EDDIE BERNICE JOHNSON of Texas. Madam Speaker, I rise in support of H. Con. Res. 488 and express my appreciation of the leadership of the gentleman from Michigan (Mr. EHLERS) and our ranking member, the gentleman from North Carolina (Mr. MILLER) for commending the National Oceanic and Atmospheric Administration, known as NOAA.

□ 1545

Indeed, we have profited from their skills. We commend both the agency and its employees for their hard work and dedication during these hurricanes. And also during the time of tornados in my area, we are getting the same type of alerts and notices and it really does save lives. We have not yet been able to save as much material damage and destruction as we have the lives, but the important thing is that we are saving lives. And as we begin to use more of our technology in building, we will see that even the material destruction will diminish. It underscores why we need to continue to support science and technology, to develop more skills for approaching and dealing with these types of catastrophes when they happen.

Texas certainly has benefited from warnings during both hurricanes in the south end of the State and tornados in the north end of the State. And we are grateful for the efficiency and dedication of these employees and are grateful for the existence of this agency that deserves continued support so that we can still benefit from our findings and for our future developments.

Mr. EHLERS. Madam Speaker, I reserve the balance of my time.

Mr. MILLER OF North Carolina. Madam Speaker, I yield 6 minutes to the gentleman from North Carolina (Mr. ETHERIDGE).

Mr. ETHERIDGE. Madam Speaker, I thank the gentleman for yielding me time. Let me thank him and my colleague, the gentleman from Michigan (Mr. EHLERS), for bringing this resolution to the floor because it is so important.

I rise to add my voice in praise of the staff and leaders of National Oceanic and Atmospheric Administration, NOAA, for the job they have been doing during this remarkably challenging time during this hurricane season.

We talk about hurricanes; but the truth is when a hurricane comes ashore, we have an awful lot of tornados that spawn from that. As any Member from a southern Atlantic coastal State can tell you, this has been a very busy season; and, unfortunately, it does not appear to be over with yet. And if the predictions are right, we are in for some pretty bumpy times in the years ahead.

The folks at NOAA and the National Weather Service have done a fine job in letting our citizens know when the storms are coming, where they would most likely strike, and they have been pretty accurate about how much wind and storm surge they can expect. As a consequence, NOAA has saved millions of lives through its timely reporting and storm tracking, and it has an awful lot to do with saving of property.

I can tell you at my office, and I expect it is true of most offices that are in the line of fire, the staffs check the NOAA Web site, NOAA tracking at 8 a.m. and 11 a.m. and 2 p.m. and 5 p.m. each day because they are the ones that have the information.

While NOAA has performed well, one of the things that could be improved is predicting the potential flooding consequences of the rain associated with these storms. That is why in the 107th Congress I introduced and Congress passed into law legislation to improve the forecasting of inland flooding and to develop an inland flood-warning index similar to the Saffir-Simpson Scale that we use for wind with hurricanes. Unfortunately, we have not seen much progress with the development of the inland flood-warning index. Congress has not provided the funds necessary to develop a warning index that can better alert Americans of flood hazards associated with tropical cyclones, and NOAA has taken only a few steps to implement this legislation.

If we had had an inland flood-warning index in place, many of the more than 70 lives lost from Bonnie, Charley, Frances, and Ivan could possibly have been saved. We heard of what has happened in recent years from what we did at the turn of the century. We still can do better.

In 1999, Hurricane Floyd killed 48 people in the State of North Carolina with heavy floods, almost all of them lived hundreds of miles from the coast and died from fresh-water flooding. That can be corrected.

In Richmond, Virginia, last month the remnants of Tropical Storm Gaston was predicted to drop 4 inches of rain. Instead, it produced more than a foot of rain and resulted in flooding that cost millions of dollars in damage to the city's historic downtown, and much of that damage could have been mitigated had the public been better prepared and had known what was going to happen.

Madam Speaker, as the appropriations process winds down, I urge you to fully implement and fund the Tropical Cyclone Inland Forecasting Improve-

ment and Warning System Development Act, similar to what we did with the Saffir-Simpson scale for hurricanes in providing warning on the coast. This will make a difference in the inland areas. This Congress has shown and has spoken with an overwhelming majority, and I also call on NOAA to move forward aggressively to implement this legislation.

We should never again suffer a hurricane season without adequate prediction tools where life-saving technology exists just beyond our current grasp. It is available. All we have to do is spend just a few dollars and it would be there. NOAA already saves countless lives. Working together we can help them save even more. I urge my colleagues to adopt this resolution.

Mr. MILLER of North Carolina. Madam Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. EHLERS. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I first want to thank the gentleman from North Carolina (Mr. MILLER) for ably managing the time on the minority side and particularly for his provision of the statistics which I find very fascinating, and I do not want to prolong my statement too much by including them, but it illustrates something very dramatically.

Often the public asks us what we do with all their tax money and why do we waste it so much. There are a good many things that the Federal Government does that are very, very good for people. This is one example of that. Funding NOAA is a very worthwhile enterprise. Given the statistics that the gentleman from North Carolina (Mr. MILLER) gave and the statistics that I gave compared to what we do today, you can extend that to tornados as well and other types of disasters.

The average lead time for tornados was 10 minutes during Hurricane Ivan, and frequently it is earlier than that for tornados in the Midwest where I live. Flash flood warnings average 57 minutes; 38 tornados occurred across Florida during Hurricane Ivan, so we really saved a lot of lives in this particular case; and it makes the expenditures for NOAA look small by comparison.

It is very important for all of us, especially the appropriators, for all of us to recognize that this is money well spent. It does save lives. It does save properties. It saves injuries, and it is very important for us to continue that.

Madam Speaker, in closing I want to thank my colleagues from the Florida delegation, virtually all of whom co-sponsored this legislation; and I particularly want to thank the gentleman from Florida (Mr. YOUNG) for his enthusiastic support of the resolution. I would also like to thank the gentleman from New York (Mr. BOEHLERT) and the ranking member, the gentleman from Tennessee (Mr. GORDON), of the Committee on Science for their support,

and the gentleman from Colorado (Mr. UDALL), the ranking member of my subcommittee.

Mr. BOEHLERT. Madam Speaker, I would like to join my colleagues in thanking the employees of the National Oceanic and Atmospheric Administration for their hard work this hurricane season. I thank my colleague from Michigan, Mr. EHLERS, for introducing this resolution and bringing it to the floor today. Each hurricane season the employees at NOAA provide vital forecasts and warnings to residents in harm's way, minimizing loss of life and property. This year they have gone above and beyond the call of duty with the high number of powerful storms making landfall in the United States. The employees at NOAA who support hurricane forecasts and warning exemplify service to the nation and I am proud to recognize their hard work today.

Mr. GORDON. Madam Speaker, this hurricane season was predicted to be an active one. Unfortunately, the prediction is being fulfilled. We have not yet come to the end of the season and already the eastern half of the country has experienced widespread damage due to three of these storms—hurricanes Charley, Frances and Ivan. In addition, two other offshore hurricanes are being monitored as we speak.

The severe coastal damage in Florida and Alabama, widespread inland flooding, and tornadoes have resulted in loss of life and property throughout the eastern part of the nation—including my home state of Tennessee. We should move quickly to provide assistance to our citizens who are now beginning to assess the damage and make plans to rebuild their homes, communities and businesses. They have a daunting task in the days ahead.

The effects of these storms are devastating, however, without accurate forecasting and time to prepare the toll in human lives would have been unimaginable. Our investments in research and development, weather satellites, specialized aircraft and computer modeling capability coupled with the dedication and professionalism of NOAA's employees has paid off in the timely warnings that we rely upon.

Madam Speaker, with this resolution we express our gratitude to the federal employees and their partners in the commercial weather business for their efforts in bringing the life-saving warnings and forecasts to our citizens. I urge my colleagues to support this effort to recognize the important work done by the employees of NOAA.

Mr. EHLERS. Madam Speaker, I have no further requests for time, and I yield back balance of my time.

The SPEAKER pro tempore (Mrs. BIGGETT). The question is on the motion offered by the gentleman from Michigan (Mr. EHLERS) that the House suspend the rules and agree to the concurrent resolution, H. Con. Res. 488, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

The title of the concurrent resolution was amended so as to read: "Concurrent resolution commending the National Oceanic and Atmospheric Administration and its employees for its dedication and hard work during Hurricanes Charley, Frances, and Ivan."

A motion to reconsider was laid on the table.

JUSTIN W. WILLIAMS UNITED STATES ATTORNEY'S BUILDING

Mr. BURNS. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 3428) to designate a portion of the United States courthouse located at 2100 Jamieson Avenue, in Alexandria, Virginia, as the "Justin W. Williams United States Attorney's Building".

The Clerk read as follows:

H.R. 3428

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION.

(a) IN GENERAL.—The building and structure described in subsection (b) shall be known and designated as the "Justin W. Williams United States Attorney's Building".

(b) DESCRIPTION.—The building and structure to be designated under subsection (a) is that portion of the United States courthouse located at 2100 Jamieson Avenue, in Alexandria, Virginia (known as the Albert V. Bryan United States Courthouse), that is attached to the courthouse main tower structure, described as A-Wing in the architectural plans, and currently occupied by the Office of the United States Attorney for the Eastern District of Virginia, Alexandria Division.

SEC. 2. REFERENCES.

Any reference in a law, map, regulation, document, paper, or other record of the United States to the building and structure described in section 1(b) shall be deemed to be a reference to the "Justin W. Williams United States Attorney's Building".

SEC. 3. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary for appropriate identifying designations to be affixed to the building and structure described in section 1(b) and for an appropriate plaque reflecting the designation and honoring Justin W. Williams and his service to the Nation to be affixed to or displayed in such building and structure.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Georgia (Mr. BURNS) and the gentleman from Texas (Ms. EDDIE BERNICE JOHNSON) each will control 20 minutes.

The Chair recognizes the gentleman from Georgia (Mr. BURNS).

Mr. BURNS. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, H.R. 3428 introduced by the gentleman from Virginia (Mr. TOM DAVIS), designates a portion of the United States courthouse located at 2100 Jamieson Avenue in Alexandria, Virginia, as the Justin W. Williams United States Attorney's Building. The full courthouse is known as the Albert V. Bryan United States Courthouse.

This bill has the bipartisan support of the entire Virginia delegation.

Born in New York City in 1942, Justin Williams earned his bachelor's degree from Columbia University in 1963, and his law degree from the University of Virginia in 1967. After graduation, Justin Williams embarked upon his legal career. From 1967 to 1986 he worked for Department of Justice, Criminal Division. He served as Assistant Commonwealth's Attorney in Arlington County

and the Assistant U.S. Attorney for the Eastern District of Virginia, based in Alexandria.

In 1986, Justin Williams was appointed Chief of the Criminal Division and served in that capacity until his death in 2003. As U.S. Attorney for the Eastern District of Virginia, he supervised over 100 prosecutors and oversaw such high-profile cases as U.S. v. Aldrich Ames, U.S. v. Robert Hanssen, and the prosecution of the Virginia Jihad Network.

In recognition of his achievements, Justin Williams received numerous awards from the Department of Justice, including the Attorney General's Award for Excellence in Furthering the Interests of U.S. National Security. Justin Williams passed away August 31, 2003.

Shortly after the 1-year anniversary of his death, it is my pleasure to bring to the floor this bill which honors a dedicated American who spent his entire career making America safer for everyone. I support this legislation, and I courage my colleagues to do the same.

Madam Speaker, I reserve the balance of my time.

Ms. EDDIE BERNICE JOHNSON of Texas. Madam speaker, I yield myself such time as I may consume.

Madam Speaker, I rise in support of H.R. 3428, a bill to designate a portion of the Alexandria courthouse located at 2100 Jamieson Avenue as the Justin W. Williams United States Attorney's Building. The bill was introduced by our colleague, the gentleman from Virginia (Mr. TOM DAVIS), and enjoys very strong bipartisan support.

U.S. Attorney Justin Williams was an extraordinary public servant who served the citizens of Virginia for over 30 years. He received his undergraduate degree from Columbia University and his law degree from the University of Virginia. During his 33 years as a Federal prosecutor, he supervised or was directly involved in every major Federal prosecution in the Eastern District of Virginia.

His career is filled with numerous awards and honors, including the Attorney General's Award for Excellence that is awarded for furthering the interest of national security, the Director's Award for Sustained Superior Performance in the years of 1990, 2000, and 2002, and Sustained Superior Performance for the years of 1990, 1991, 1997, 1998, and 1999.

In addition to being an outstanding lawyer, Justin Williams was a thoughtful mentor, loyal friend, outstanding role model, devoted husband, and a loving father. It is most fitting that we honor the distinguished career of this dedicated public servant with this designation.

□ 1600

Mr. Speaker, I have no additional requests for time, and I yield back the balance of my time.

Mr. BURNS. Mr. Speaker, I urge my colleagues' support of H.R. 3428, and
